

## Data Anywhere, Anytime, In Your Hands

In the landscape of data accessibility, Metron acts as a companion app to Smart Viu, addressing the increasing demand for immediate data access. It enables users to view data published through Smart Viu on any device, granting access to key data points from multiple Warehouses. Metron ensures secure connectivity to WMS instances via OOGY middleware, offering managers the ability to monitor KPIs across their network anytime, anywhere.

### Features

- Mobile application available through respective App Stores.
- Ability to configure multiple Warehouse connections.
- All data views that are setup in Smart Viu can be accessed here, with a further control available for mobile device.
- Configurable Alerts so you can be pinged when a given condition is encountered.

# Value Proposition

Single application to provide mobility for data access.

KPIs in your hands.

Take actions on data (if needed) immediately.

Alerts on critical conditions.
